

## Editorial message

The Pan Arab Rhinology Society (PARS) has celebrated its 10<sup>th</sup> anniversary in October this year. The 10<sup>th</sup> PARS conference was held in Algeria, first time in North African Country. The gathering was outstanding, scientific contents were up to date and social events were distinguished. The meeting was an excellent chance to bridge the gap between the North African Countries and all the Arab Countries despite language difficulties. The meeting is the fruit of the hard work of all PARS members from all Arab countries throughout the last two decades to push the PARS ahead. The coming 11<sup>th</sup> PARS meeting has been scheduled in Cairo, Egypt in collaboration with RhinoEgypt 26, March 5-7, 2020. All the PARS members will do their best to attend and participate in such a distinguished combined meeting.

The Pan Arab Journal of Rhinology (PAJR), being an online, open access and peer reviewed journal, has gained great popularity and has been receiving many submitted articles from all over the world. The big number of submitted articles offers an excellent chance to select and publish only the most distinguished ones. Unfortunately, at the same time, led to the rejection of the articles that were not up to the standard. The editorial team is working hard to receive international recognition and include the PARS amongst distinguished regional and international Journals in the near future. The Good news is that the PAJR accepts articles that covers all Rhinology subspecialties including, Nasal surgery, endoscopic sinus surgery, rhinoplasty, snoring, obstructive sleep apnea (OSA), maxillofacial in addition to allergy.

The PARS committee and PAJR editorial board wish all Rhinologists and Otorhinolaryngology physicians all over the world the best and looking forward to meeting you all at the 26<sup>th</sup> RhinoEgypt and 11<sup>th</sup> PARS conferences in Cairo next year, March 5-7, 2020.
